The new Family Care First website is a resource sharing space for both FCF members and the public. This new website aims to minimize FCF team's effort in sharing information to members as well as maximizing the impact of the information that FCF team and each member have.

The bilingual website will use WordPress content management system. This system is cost effective (a lot of free plug-in), customizable, and easy to maintain.

About Us explains to the public of what Family Care First is as well as highlighting our members and explaining the process of becoming a member.

The **Impact** section highlight key indicators through our interactive infographic map as well as impact stories.

The **Resources** section is divided into two: public access and member area. The public access has resources that we would like to share externally to the public and the media whereas the member area contain information that are suitable for our members. Each organization will be given a username and password where they can log into the member area to get access to member contact details, internal bulletin, Training Documents/Tips, researches collected by our CP team, downloadable materials and internal event calendar.

To make people **Contacting** us easier, we have a Google map and the contact form.

For the **Search** function uses WordPress default search function.
